Applicant's election without traverse of claims 1-19,25-27 in Paper No. 5 is acknowledged.

Claims 20-24,28-30 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 5.

Claims 1,4,7 would be clearer if hydrogen gas were recited instead of just hydrogen.

Claim 25 is ungrammatical and it appears that the singular form of "isotopes" was intended.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-9,25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

In claims 1-9,25, "d<sup>10</sup>-metal" is not enabled as to which metal(s) this term includes, other than platinum, nor would one of ordinary skill in the art be able to determine which metal(s) this term includes because the term is not known in the art.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9,15,17,25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1-9,25, "d<sup>10</sup>-metal" is indefinite as to which metal(s) this term includes, other than platinum; ie. it is indefinite as to which metals are considered to be a "d<sup>10</sup>-metal."

In claim 15, "the column" lack(s) proper antecedent basis in the claim(s).

In claim 15, "the alkaline solution" lack(s) proper antecedent basis in the claim(s).

In claim 17, "the column" lack(s) proper antecedent basis in the claim(s).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 25 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brenna '038 or Klatt '660 or Wilbur '651 or Hamrin '484.

Brenna, Klatt, Wilbur and Hamrin each suggest the instantly claimed process of absorbing an isotope on a metal which appears to be a "d10-metal" and also would appear to provide a transportable form of isotope. See cols. 2,4 of Brenna; col. 3 of Klatt; col. 1 of Wilbur; and cols. 1-3 of Hamrin.

Claim 26 is rejected under 35 U.S.C. 103(a) as being unpatentable over Arino, et al.

Arino suggests the instantly claimed process of providing a Pt surface in a column, ie. Pt coated copper granules, passing an acidic radioiodine solution through the column to retain, ie. load, the column and then eluting the column. See the abstract.

Claims 1-19 appear allowable over the cited prior art of record none of which teaches or suggests the instantly claimed combination of process steps.

Claims 10-19,27 are objected to as dependent on a rejected base claim.
